## A VOICE OF WOMEN

**T***wenty-three years ago* a woman by the name of Sheri Poe stepped into the athletic footwear industry because she knew there was a *better way*. A way more suited to the female form. By *challenging convention*, she moved an entire industry to build products *better suited* to the needs of women.

*Fitness fads* have come and gone, but one thing remains true to this day: rykä is the only footwear company *managed, designed, and solely dedicated* to creating *women's performance footwear*.

*Women supporting women* is the force motivating rykä's loyal and like-minded core. Their *passion and dedication* inspires us to get vocal, empower others, and stand up for the way of *life we love*.

A large, stylized teal illustration of a dandelion flower with its seed head, positioned on the left side of the page. The flower has multiple layers of petals and a detailed seed head. The stem is long and thin, with a few leaves visible at the bottom.

# OUR ANGLE ON PERFORMANCE

**For over 20 years**, rykä has been **innovating athletic footwear** exclusively for women.

In fact, everything we create is **designed by women**. From the shape of her foot to the angle of her stride, we understand that women require more than just a downsized version of a men's athletic shoe.

## the science

Ryväskylä knows that a **woman's foot shape**, muscle movement, and skeletal structure are all inherently different from a man's. The **"Q-angle"** (quadricep angle) – the anatomical relationship between the hip and knee – measures **5–7 degrees greater for women** than men.

As a result, women tend to shift more weight to the outside of their feet which leads to over-pronation, instability at foot strike, and higher risk of injury.

## our solution

**Ryväskylä's design philosophy** integrates all of our technologies into one of the most researched, women-specific lasts in the industry. A **complete footwear solution** that fits the shape of a woman's foot perfectly – with a narrower heel, roomier forefoot, increased instep volume, and more secure footbed. The result is a **high-performance, athletic shoe engineered** to address the **unique biomechanics of active women** for unsurpassed fit, comfort, cushioning and control.

# OUR TECHNOLOGY

NITRACEL® CUSHIONING  
CARTRIDGE

N-GAGE™

N²-DM™

Q-ANGLE P.C.™

S.G.S.™

I.H.G.™

C2™

## cushioning

**NITRACEL® CUSHIONING CARTRIDGE:** Engineered from Nitrogen-infused foam, this innovative heel cushioning cartridge absorbs impact and provides energy return for a smooth, resilient ride.

**N-GAGE™:** High-grade EVA foam and premium rubber combine to create a super lightweight cushioning and rebound system that continues to exceed industry standards.

**N²-DM™ (NITRACEL® DAMPENING MATERIAL):** Our most advanced cushioning technology uses a flexible Nitracel™ foam compound to deliver high-level shock absorption and energy return, typically located in the heel and forefoot areas, where women need it most.

## control

**Q-Angle P.C.™ (Quadri-cep-Angle Pronation Control):** A dense durometer of material (usually grey in color) located at the medial section of the midsole platform on various rykä shoes. Based on Q-Angle research, women tend to shift their weight outward upon impact. Q-Angle P.C.™ assists in the controlling process of accurate foot strike alignment from heel-to-toe transition.

**S.G.S.™ (Skeletal Guidance Shank):** Uniquely engineered to keep the shoe lightweight yet provide mid-foot support during heel-to-toe transition. The S.G.S.™ works with the other technologies built around it by acting as a center frame stabilizer.

**I.H.G.™ (Infused Heel Guidance):** Designed to provide extra lateral stability support, this infused TPU clip works with the midsole to secure the heel and guide foot strike alignment.

## comfort

**C2™ Cartridge:** A highly innovative cushioning system engineered with an encapsulated Visco-Elastomer pack, with active spheres that provide a spring-like quality for superior performance, cushioning and comfort.

**Ortholite® Footbed:** A molded, highly engineered comfort footbed that provides maximum ventilation, wicks moisture, is tear proof, has antimicrobial built in the foam compound and is hand washable.

# KELLY RIPA AND RYKÄ

For **Kelly Ripa**, fitness isn't a hobby...it's her **lifestyle**. Whether she's at the gym or running through the streets of New York City, she makes time every day to connect with her **inner athlete**. It's her passion because it transforms her from **fit to fabulous** in every way. So, we've partnered with Kelly to create a collection of **high-performance** shoes with everything she needs for a full-spectrum workout to **Take Shape**.
