ASPIRE

The new **Ryka Aspire** is the latest addition in our collection of lightweight running shoes. The midsole/ outsole features multi-directional flex zones which allow for the foot's own natural movement. The staggered deep flex channels provide an intuitive approach to the body's own stabilization of the foot as well as lateral support in a natural foot strike environment. The outsole grade EVA provides cushioning and abrasion resistance. The low-profile (6.4 oz) 10mm heel to toe variance mimics natural foot movement (as if you were barefoot).

Weight: 6.4 oz.
